This book introduces two internationally recognized bodies of knowledge: COBIT 5 from a cybersecurity perspective and the NIST framework for improving critical infrastructure cybersecurity (CSF), emphasizing the processes directly related to governance, risk management, and audit. The book maps the CSF steps and activities to the methods defined in COBIT 5, extending the CSF objectives with practical and measurable activities that leverage operational risk understanding in a business context. This allows the ICT organization to convert high-level enterprise goals into manageable, specific goals rather than unintegrated checklist models.

Who are the people involved in developing and implementing ISO IEC 27001:2013? Can management personnel recognize the monetary benefit of ISO IEC 27001:2013? What should the next improvement project be that is related to ISO IEC 27001:2013? How is the value delivered by ISO IEC 27001:2013 being measured? Are we assessing ISO IEC 27001:2013 and risk? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role in every company, organization, and department unless you are talking about a one-time, single-use project within a business. There should be a process, whether that process is managed and implemented by humans, AI, or a combination of the two. It needs to be designed by someone with a complex enough perspective to ask the right questions, someone capable of asking the right questions, and step back and say, "What are we really trying to accomplish here, and is there a different way to look at it?" For more than twenty years, the art of service self-assessments empowers people who can do just that, whether their title is marketer, entrepreneur, manager, salesperson, consultant, business process manager, executive assistant, IT manager, CIO, etc. They are the people who rule the future; they are people who watch the process as it happens and ask the right questions to make the process work better. This book is for managers, advisors, consultants, specialists, professionals, and anyone interested in ISO IEC 27001:2013 assessment. All the tools you need to do an in-depth ISO IEC 27001:2013 self-assessment featuring 690 new and updated case-based questions organized into seven core areas of process design. This self-assessment will help you identify areas in which ISO IEC 27001:2013 improvements can be made. In using the questions, you will be better able to diagnose ISO IEC 27001:2013 projects, initiatives, organizations, businesses, and processes using accepted diagnostic standards and practices, implement evidence-based best practice strategies aligned with overall goals, integrate recent advances in ISO IEC 27001:2013 and process design strategies into practice according to best practice guidelines, using a self-assessment tool known as the ISO IEC 27001:2013 scorecard, you will develop a clear picture of which ISO IEC 27001:2013 areas need attention.

included with your purchase of the book is the iso iec 27001 2013 self assessment downloadable resource which contains all questions and self assessment areas of this book in a ready to use excel dashboard including the self assessment graphic insights and project planning automation all with examples to get you started with the assessment right away access instructions can be found in the book you are free to use the self assessment contents in your presentations and materials for customers without asking us we are here to help
